Summary. The article contains a review of the family Pterophoridae of Kyrgyzstan. Four species, new to the science, are described: *Agdistis manas* sp.n., *Agdistis rutjani* sp.n., *Capperia pluschi* sp.n., *Calyciphora ludmilae* sp.n. One species, *Stenoptilia inexpectata* Gibeaux, 1995, syn.n. is reduced to a synonym for *Stenoptilia veronicae* Karvonen. The total is 64 species of 22 genera.

Резюме. Дан обзор видов семейства Pterophoridae Киргизии. Описаны четыре новых вида для науки: *Agdistis manas* sp.n., *Agdistis rutjani* sp.n., *Capperia pluschi* sp.n., *Calyciphora ludmilae* sp.n. Один вид, *Stenoptilia inexpectata* Gibeaux, 1995, syn.n. сводится к синониму к *Stenoptilia veronicae* Karvonen. Всего приводится 64 вида из 22 родов.

INTRODUCTION

The nature of Kyrgyzstan is extraordinarily rich and various. Most of the territory is covered by mountains. This is a unique place in Central Asia where the species of wild animals and plants are concentrated. Among the plants and animals there are many rare and endemic species. The pteroforidae fauna here is also rich in its diversity of species. There have been no special works on the pteroforidae fauna of Kyrgyzstan until now. The literature contains fragmentary information on the distribution and description of new species of the Pterophoridae from Kyrgyzstan [Zagulajev, 1986, 2002; Gibeaux, 1996; Arenberger, 1998, 1999, 2001, 2002; Arenberger & Buchbaum, 1998, 2000; Gielis, 2000]. The basis of this work was a series of special collections of the Pterophoridae in Kyrgyzstan made by the Russian entomological expedition in June-August, 2008. As a result, more than 1000 specimens of the 30 species were collected. The fund collections of the Zoological Institute, St. Petersburg (ZISP), of the Institute of Systematics and Ecology of Animals, Novosibirsk (ISEA) and the collections of individual collectors were also used. Summing up all the information on the Pterophoridae of Kyrgyzstan from the literature and available material we allocated 64 species of 22 genera. Four species new to science are described. The holotypes of the described species are stored in the ISEA (Novosibirsk, Russia) and ZISP (St-Petersburg, Russia), the paratypes are in the BMNH (London) and in the collections of the authors (CUK).

Abbreviations:

ISEA – Institute of Systematics and Ecology of Animals (Novosibirsk, Russia).

ZISP – Zoological Institute, (St. Petersburg, Russia).

BMNH – British Museum Natural History, (UK, London).

CUK – The collection by P. Ustjuzhanin and V. Kovtunovich (Novosibirsk and Moscow, Russia).

TAXONOMY

Agdistis adactyla Hübner, ([1823])*Alucita adactyla* Hübner, [1823]: t. 7, figs. 32-34. (Type locality: Austria).

Material. East. slope of Fergana range, Urumbash riv., 2-3 km NNE of pass Urumbash, to the light, 25.07.2005 – 1♂, V. Dubatolov, E. Nikolaeva; Alai val., 20 km SW of Daraut-Kurgan, 2700 m, 7.07.2008 – 3♂, Ustjuzhanin & Kovtunovich; the Central Tian Shan', right bank of Naryn riv., val. Kazarman, 1500 m, 6-7.08.2008 – 1♂, 1♀, A. Sochivko.

Range. Europe, Asia Minor, Central Asia, Kazakhstan, the entire Siberia, Yakutia, southern Russian Far East, Iran, Afghanistan, Mongolia, China: Beijing, Tianjin, Hebei, Inner Mongolia, Shaanxi, Gansu, Ningxia, Xinjiang [Li, Hao, Wang, 2003].

Flight period. June – August.*Agdistis tamaricis* Zeller, 1847*Agdistis tamaricis* Zeller, 1847: 899. (Type locality: France).

Material. Inner Tian Shan', Naryn riv., val. Kazarman, 1400 m, 21.07.2000 – 2♂, 2♀, S. Churkin.

Range. Europe, Turkmenistan, Kazakhstan, Kyrgyzstan, Tajikistan, Uzbekistan, Iran, Afghanistan, Pakistan, Mongolia, China: Tianjin, Hebei, Inner Mongolia, Shanghai, Shandong, Shaanxi, Gansu, Ningxia, Taiwan [Li, Hao, Wang, 2003].

Flight period. July.*Agdistis ingens* Christoph, 1885*Agdistis ingens* Christoph, 1885: 124. (Type locality: Turkmenistan).

Range. The south-eastern European part of Russia, Turkmenistan, Kazakhstan, Kyrgyzstan, Tajikistan, Uzbekistan, Afghanistan, Mongolia, China: Gansu [Li, Hao, Wang, 2003].

Notes. Specified for Kyrgyzstan from the literature [Arenberger, 1995].

***Agdistis asthenes* Bigot, 1970**

Agdistis asthenes Bigot, 1970: 283. (Type locality: Mongolia).

Material. Tian Shan', vil. Naryn, Chu riv., Orto-Tokoj reservoir, 1650 m, 7.07.2000 – 3♂, Rutjan; Issyk-Kul', Kadzny-Sai vic., 1650 m, 8-9.07.2000 – 1 ♂, 1 ♀, E. Rutjan.

Range. Mongolia, Kazakhstan, Kyrgyzstan.

***Agdistis turkestanica* Zagulajev, 1990**

Agdistis turkestanica Zagulajev, 1990: 113. (Type locality: Kazakhstan).

Agdistis pseudomevaniella Gibeaux, 1997: 418. (Type locality: Kazakhstan).

Range. Kazakhstan, Turkmenistan, Kyrgyzstan.

Notes. Specified for Kyrgyzstan from the literature [Gielis, 2003].

***Agdistis manas* sp.n.**

Material. Holotype, ♀, ISEA, gen. prep. 201112, Sary Jaz, Kaingda riv. val., near the mouth, to the light, 5.08.2003, V. Dubatolov, E. Nikolaeva. Paratype, ibid, 3♀. 1 paratype is stored in ZISP, gen. prep. 1793, the other is in BMNH (London). gen. Prep. 22932; 1♀, Kashgaria, Taldy-Bulak creek, between Nura and Irkeshtam, to the light, 18.07.2003, V. Dubatolov, E. Nikolaeva, the rest are in the collection of the authors (col. pl. II: 1, 5).

External characters. The head, thorax and tegulae are light grey. The labial palpi are short and brushy. They are two times shorter than the eye diameter. The length of the forewing is 15 mm. The wingspan is 32-33 mm, the holotype has 32 mm. The forewings are light grey, with three dark dots located in the middle part of the wing. The costal edge of the wing is enlightened in the middle and darkened at the base. Near the top of the wing on the costal edge there is a dark elongated spot. The hindwings are monotonous light grey. The fringe on both wings is white, noticeably lighter than the background of the wings.

Female genitalia. The rear apophyses are short. The antrum is tubular, its bottom has a distinct oval notch, the edges of the antrum form claws (the shape of antrum resembles a tooth with fangs). The ductus is short and membranous. The copulatory pouch is oval, weakly sclerotized.

Differential diagnosis. In the female genitalia by the elongated antrum the species is close to *A. meridionalis* Zeller and *A. zhengi* Hao & Li, but clearly differs from the latter by sharp claws on the edges of the back margin of the antrum. The new species can also be distinguished from the latter by a larger size.

Flight period. July - August.

Range. Kyrgyzstan.

Etymology. The species is named after the hero of the Kyrgyz epics, Manas., It means “hero”.

***Agdistis rutjani* sp.n.**

Material. Holotype, female, ZISP, gen. prep. 1794, Tian-Shan', vil. Dzhahal-Abad, Tash-Kumyr, 650 m, 1.06.2003 – 1♀, E. Rutjan (col. pl. II: 2, 6).

External characters. The holotype: the head, thorax and tegulae are ash-grey. The labial palpi are very short and brushy. They are two times shorter than the eye diameter.

The length of the forewing is 13 mm. The wingspan is 27 mm. The forewings are ash-grey, with three dark dots located in the middle part of the wing. The costal edge of the wing is enlightened, near its top there are barely visible small dots. The hindwings are monotonous ash-grey. The fringe on both wings is white, noticeably lighter than the background of the wings.

Female genitalia. The rear apophyses are short. The antrum is short and wide, caliciform. On its sides there are two small outgrowths. The ductus near the antrum is wide, at its confluence with the bursa copulatrix it forms a sharp bend. The bursa is oval, weakly sclerotized.

Differential diagnosis. In the female genitalia, in general habitus the species is close to *A. karakalensis* Zag. and *A. karabachica* Zag., but clearly differs from the latter by the dome top of the 7th sternite, while the top of the 7th sternite in *A. karakalensis* Zag. has a distinct notch and *A. karabachica* Zag. has this top flattened and slightly wavy. The new species is also different from the latter by another shape of the antrum, by the ductus greatly widened near the antrum and by the short rear apophyses.

Flight period. June.

Distribution. Kyrgyzstan.

Etymology. The species is named after the Ukrainian entomologist Evgeni Rutjan, a known specialist in Lepidoptera: Psychidae.

***Gillmeria macrornis* (Meyrick, 1930)**

Platyptilia macrornis Meyrick, 1930: 567. (Type locality: SE Kazakhstan)

Platyptilia kerzhneri Zagulajev & Pentschukowskaja, 1972: 688. (Type locality: Mongolia).

Material. Talas range, Maydantal gorge, 2230 m, 21.07.2000 – 2♂, I. Plusch.

Range. South-eastern European Russia, Central Asia, South Siberia, the Russian Far East (South Coastland), China: Shaanxi, Sichuan [Li, Hao, Wang, 2003], Mongolia.

***Gillmeria tetradactyla* (Linnaeus, 1761)**

Phalaena Alucita tetradactyla Linnaeus, 1761: 370. (Type locality: Europe).

Alucita ochrodactyla Denis & Schiffermuller, 1775: 145. (Type locality: Austria).

Material. NE of Fergana range, 10 km SW of Alai val. East Kugart riv., 2000 m, 20.07.2000 – 2♂, S. Churkin; Talas Alatau range, 1300 m, 8.05.1991 – 1♂, Yu. Beskokotov; West Kyrgyzstan, Chatkal riv., vil. Aktash, 40 km S. of Yankee-Bazar, 1400 m, 1.07.1998 – 1 spec., I. Plusch; east. slope of Fergana range, Urumbash-East riv., 2-3 km NNE of pass Urumbash, to the light, 25.07.2005 – 6 spec., V. Dubatolov, E. Nikolaeva; Sary-Chelek, 1900 m, 20.06.2004 – 1♂, Danilevskyii; Toktogul reservoir, 915 m, 28.06.2008 – 1♀, P. Ustjuzhanin & V. Kovtunovich; 10 km to W of vil. Tuluk, 3 km N of pass Jamanbai-Bel', 1990m, N41°54' E73°28', 29-30.06.08 — 11 spec., Ustjuzhanin & V. Kovtunovich; Sary-Kamysh, 1250 m, 30.06.2008 – 2♂, P. Ustjuzhanin & V. Kovtunovich; Alai range, 10 km W of Gulcha, 1700 m, 9.07.2008 – 1♂, P. Ustjuzhanin & V. Kovtunovich.

Range. All Europe, south of Western Siberia, Tajikistan, Kyrgyzstan.

***Gillmeria pallidactyla* (Haworth, 1811)**

Alucita pallidactyla Haworth, 1811: 478. (Type locality:

Great Britain).

Platyptilia sachalinensis Matsumura, 1911: 58. (Type locality: Sakhalin, Russia).

Platyptilia pallidiola Matsumura, 1931: No. 2069. (Type locality: Japan).

Range. Europe, Siberia, Russian Far East, Turkmenistan, Kyrgyzstan, Uzbekistan, China, Japan, Korea, North America.

Notes. Specified for Kyrgyzstan from the literature [Arenberger, 2002].

Platyptilia calodactyla (Denis & Schiffermüller, 1775)

Alucita calodactyla Denis & Schiffermüller, 1775: 146. (Type locality: Austria).

Material. Kitshik-Alai range, Isfayram-Sai riv., 2750 m, 14-19.07.1999 – 6♂, E. Rutjan; Suusamyr-Too range, Ala-Bel' mts. gorge, Chuchkan riv. val., 1650 m, 8.07.2005 – 1♂, 1♀, E. Rutjan; Zaalaï range, vil. Nura, 3200-3500 m, 18-31.07.2006 – 1♂, A. Sochivko; Alai range, Isfayram-Sai riv., tract Langar, 1900 m, 21.07.1999 – 1♂; 10 km W of vil. Tuluk, 3 km to N of pass Jamanbai-Bel', 1990 m, N41°54', E73°28', 29-30.06.2008 – 3♂, 2♀, P. Ustjuzhanin & V. Kovtunovich.

Range. Europe, Northern Africa, Asia Minor, Kazakhstan, Central Asia, Siberia, Russian Far East, China, Mongolia.

Platyptilia longiloba Gibeaux, 1997

Platyptilia longiloba Gibeaux, 1997: 422. (Type locality: Uzbekistan).

Material. Kashgaria, Taldy-Bulak creek, between Nura and Irkeshtam, to the light, 18.07.2003 – 1♂, V. Dubatolov, E. Nikolaeva.

Range. Uzbekistan, South Kyrgyzstan.

Cnaemidophorus rhododactylus (Denis & Schiffermüller, 1775)

Alucita rhododactyla Denis & Schiffermüller, 1775: 146. (Type locality: Austria).

Platyptilia koreana Matsumura, 1931: No. 2068. (Type locality: Japan and Korea).

Material. Chatkal riv. val., 15 km NE of Kanysh-Kiya, 1900 m, 15-16.07.2001 – 1♂, A. Zhdanko; Toktogul reservoir, 915 m, 28.06.2008 – 1♂, 1♀, P. Ustjuzhanin, V. Kovtunovich; Karagai-Bulak vil., Ysyk-Ata riv., 1300 m, 20-22.07.2011 – 1♂, 2♀, V. Ivonin.

Range. Europe, North Africa, the Caucasus, Kazakhstan, Central Asia, Siberia, south of the Russian Far East, Asia Minor, Japan, Korea, India, North America.

Stenoptilia manni (Zeller, 1852)

Pterophorus manni Zeller, 1852: 375. (Type locality: Turkey).

Material. Left bank of Chuchkan riv., 2 km of Ashuu-Bulak riv. mouth, 42°07'N 72°48' E, 1650-1700 m, 3.07.2000 – 1♀, V. Dubatolov.

Range. Europe, the Caucasus, Minor Asia, Uzbekistan, Kyrgyzstan.

Stenoptilia pterodactyla (Linnaeus, 1761)

Alucita pterodactyla Linnaeus, 1761: 370. (Type locality: Sweden)

Material. Inner Tian-Shan', north. slope of Moldo-Too range, 5 km N of pass Korogo, 1800 m, 16.07.1998 – 1♂, I. Plusch.

Range. Europe, Kazakhstan, Kyrgyzstan, Siberia, Russian Far East, North America.

Stenoptilia veronicae Karvonen, 1932

Stenoptilia veronicae Karvonen, 1932: 79. (Type locality: Finland).

Stenoptilia agutsana Ustjuzhanin, 1996: 374. (Type locality: South of Transbaikalie, Russia)

Stenoptilia inexpectata Gibeaux, 1995: 103. (Type locality: Orta-Kokpak, Kazakhstan) **syn.n.**

Material. Kyrgyz range, env. Bishkek, 7.07.2001 – 1♂, V. Dubatolov; Tian-Shan' range, Suusamyr, Ala-Bel' mts. gorge, Chuchkan riv. val., 1650 m, 29.07.2005 – 2♂, E. Rutjan.

Range. Northern Europe, Kyrgyzstan, Siberia, Russian Far East.

Stenoptilia bipunctidactyla (Scopoli, 1763)

Phalaena bipunctidactyla Scopoli, 1763: 257. (Type locality: Slovenia).

Material. Vil. Boru-Bash, 1,5 km N-W of Przhevalsk, 5.6.1982 – 1♀, Trystan.

Range. Europe, Kazakhstan, Central Asia, Siberia, Russian Far East.

Stenoptilia nolkeni (Tengstrom, 1870)

Pterophorus nolkeni Tengstrom, 1870: 366. (Type locality: Russia, Karelia).

Pterophorus caesius Snellen, 1884: 189. (Type locality: Irkutsk, Russia).

Stenoptilia altaica Arenberger, 2002: 137. (Type locality: Altai, Russia).

Material. Inner Tian Shan', Naryn riv. val., 15 km E of Naryn, 2250 m, 27-28.07.2000 – 1♂, S. Churkin; NE of Zaalaï, Kaltabulak riv, 15 km SW of Irkeshtam, 3100 m, 16.07.2000 – 1♂ S. Churkin; Sary Jaz, Kaingda riv. val., near the mouth, to the light, 6.08.2003 – 1♀ V. Dubatolov, E. Nikolaeva; East slope of Fergana range, Urumbash-East riv., 2-3 km NNE of pass Urumbash, to the light, 25.07.2005 – 1♂, V. Dubatolov, E. Nikolaeva; Sary-Kamysh, 41°45'N, 73° 54' E, 1250 m, 30.06.2008 – 1♀; Tian-Shan', vil. Dzhalal-Abad, distr. Kotshkor-Ata, pag. Toskool Alash-Sai gorge vic., 1100 m, 30-31.05. 2003 – 1♂, E. Rutjan; Central Tian-Shan', Sursarym val., Tuluk vil. vic., Charya creek val., N42°15', E73°54', 2280 m, 2.07.2008 – 1♂, Ustjuzhanin, Kovtunovich; Zaalaï range, Aram-Kungei, 3000 m, 8.07.2008 – 3♂, P. Ustjuzhanin V. Kovtunovich; Zaalaï range, Taldy-Bulak creek, between Nura and Irkeshtam, 2900 m, 17.07.2008 – 2♂, P. Ustjuzhanin, A. Sochivko; right bank of Naryn riv., vil. Kazarman, 1500 m, 6-7.08.2008 – 2♂, 1♀, A. Sochivko.

Range. European part of Russia, Kazakhstan, Kyrgyzstan, Siberia, Russian Far East, Korea.

Stenoptilia aktashiensis Gibeaux, 1997

Stenoptilia aktashiensis, Gibeaux, 1997: 430. (Type locality: Uzbekistan).

Material. South Kyrgyzstan, NW part of Fergana range, Alash gorge, 1100 m, 7.07.1998 – 1♂, I. Plusch; North. Alai, the riverhead of Gultcha riv., Katta-Karakol riv. mouth vic., 15.07.2003 – 1♀, V. Dubatolov, E. Nikolaeva; Tian-Shan' range, Talas-Alatau, Kara-Buura mts. gorge, 3100-3350 m, 20.07.2000 – 3♂, E. Rutjan; Zaalaï range, Nura vic., 3200-3500 m, 18-31.07.2006 – 1♀, Sochivko A; Chui reg., Karagai-Bulak vil., Ysyk-Ata riv., 1300 m, 20-23.07.2011 – 1♂, 1♀, V. Ivonin.

Range. Uzbekistan, Tajikistan, Kyrgyzstan, Kazakhstan, Turkmenistan.

Stenoptilia caradjai Gibeaux, 1995

Stenoptilia caradjai Gibeaux, 1995: 96. (Type locality: Tajikistan).

Material. Alai range, Maydantau, vil. Maydan, 1700 m, 4.07.1998 – 2♂, I. Plusch; North. Alai, left slope of Gulcha riv., 3 km below the mouth of Katta-Karakol riv., 2500–3000 m, 13.07.2003 – 1♂, V. Dubatolov; east slope of Fergana range, Urumbash-East riv., 2-3 km NNE of pass Urumbash, to the light, 25.07.2005 – 1♂, V. Dubatolov, E. Nikolaeva; SW Alai, 10 km N of Daraut-Kurgan, road between the passes Shiman-Bel', Shiman and Tengizbay, 24.07.2003 – 1♂, R. Dudko; NE of Fergana Range, 10 km SW of Alai, East Kugart riv., 2000 m, 20.07.2000 – 1♂, S. Churkin; Central Tian-Shan', Suusarym val., Tuluk vil. vic., Charya creek val., N42°15', E73°54', 2280 m, 2.07.2008 – 1♀, P. Ustjuzhanin, V. Kovtunovich.

Range. Tajikistan, Kyrgyzstan, Kazakhstan.

Stenoptilia coenei Gielis, 2000

Stenoptilia coenei Gielis, 2000: 127. (Type locality: Kyrgyzstan).

Material. Kyrgyz range, riverhead of Merke riv., 3000 m, 4.08.1998 – 1♂, A. Zhdanko; Tian-Shan' range, Suusamyr-Too, Ala-Bel' mts. gorge, Chuchkan riv. val., 1650 m, 8.07.2005 – 1♂, E. Rutjan.

Range. Kyrgyzstan.

Stenoptilia transversata Gibeaux, 1995

Stenoptilia transversata Gibeaux, 1995: 99. (Type locality: Kyrgyzstan).

Material. West. Kyrgyzstan, Talas range, pass Kara-Buura, 2700 m, 26.06.1998 – 1♀, 17-20.07.2000 – 2♀, I. Plusch; Terskei Alatau, Orta-Kokpak riv., 2700 m, 10.07.1993 (V. Murzin); Kashgaria, Taldy-Bulak creek, between Nura and Irkeshtam, to the light, 18.07.2003 – 1♀, V. Dubatolov, E. Nikolaeva; the lower reaches of Archalsu riv., right affluent of Koksu riv., 19-21.07.2003 – 1♂. Dubatolov and Ko; 5 km W of vil. Nura, Kaltabulak riv., 3100 m, 15.07.2008 – 6♂, 10♀; 3300 m, 18.07.2008 – 17♂, 18♀, P. Ustjuzhanin, A. Sochivko; Zaala range, Taldy-Bulak creek, between Nura and Irkeshtam, 2900 m, 17.07.2008 – 1♀, P. Ustjuzhanin, A. Sochivko; 25 km S of Kara-Balta, Sosnovka, to the light, 14.08.1987 – 1♂, 1♀, A. Lwowskyi; Talas Alatau range, Manas mts., 2300-2450, 22-24.07.2000 – 1♂, E. Rutjan; Tian-Shan', Suusamyr-Too range, Kyrgyz mts. gorge, 3050-3200 m, 29-30.07.2000 – 1♂, E. Rutjan; Issyk-Kul' reg., 7 km N of Grigorievsk vil., Grigorievsk gorge, Karagai-Bulak range, Chan-Bulak mount., 2300 m, 27.07.2011 – 1♀, V. Ivonin.

Range. Kyrgyzstan, Kazakhstan.

Stenoptilia etcetera Arenberger, 1998

Stenoptilia etcetera Arenberger, 1998: 297. (Type locality: Kyrgyzstan).

Range. Specified for Kyrgyzstan from the literature [Arenberger, 1998]; was not detected by us.

Stenoptilia naryna Arenberger & Buchsbaum, 2000

Stenoptilia naryna Arenberger, 2000: 275 (Type locality: Kyrgyzstan).

Material. Zaala range, Aram Kungei, 10-15.07.1992 –

1♂, A. Sochivko; 131 km S Osh, upper stream of Kichik-Alai riv., 3300 m, 25.06.2008 – 1♂, P. Ustjuzhanin, V. Kovtunovich; Zaala range, 25 km SW of Daraut-Kurgan, 2800 m, 6.07.2008 – 8♂, 4♀, P. Ustjuzhanin, V. Kovtunovich; Zaala range, Aram-Kungei, 3000 m, 8.07.2008 – 17♂, 12♀, P. Ustjuzhanin, V. Kovtunovich; 5 km W of vil. Nura, Kaltabulak riv., 3300 m, 15.07.2008 – 1♂, 3100 m, 18.07.2008 – 1♀, P. Ustjuzhanin, A. Sochivko.

Range. Kyrgyzstan, Kazakhstan.

Stenoptilia kirghizica Zagulajev, 2002

Stenoptilia kirghizica Zagulajev, 2002: 362 (Type locality: Kyrgyzstan).

Material. NE spurs of Suusamyr-Too range, Kobuksuu riv., 2500 m, 6.07.1987 – 1♂.

Range. Kyrgyzstan.

Stenoptilia murzini Gibeaux, 1995

Stenoptilia murzini Gibeaux, 1995: 101. (Type locality: Kyrgyzstan).

Material. 131 km S of Osh, upper stream of Kichik-Alai riv., 3300 m, 25.06.2008 – 5♂, P. Ustjuzhanin, V. Kovtunovich; Central Tian-Shan', Suusarym val., vil. Tuluk, Charya creek val., N42°15', E73°54', 2280 m, 2.07.2008 – 1♀, P. Ustjuzhanin, V. Kovtunovich; 5 km W of vil. Nura, Kaltabulak riv., 3100 m, 15.07.2008 – 1♀, P. Ustjuzhanin, A. Sochivko; Zaala range, Nura vic., 3200-3500 m, 18-31.07.2006 – 1♂, A. Sochivko; North. Alai, left slope of Gulcha riv., 3 km below the mouth of Katta-Karakol riv., 2500-3000 m, 12.07.2003 – 1♀, V. Dubatolov; Issyk-Kul' reg., 7 km N of Grigorievsk vil., Grigorievsk gorge, Karagai-Bulak range, Chan-Bulak mount., 2300 m, 27.07.2011 – 2♂, V. Ivonin.

Range. Kyrgyzstan, Uzbekistan, Kazakhstan.

Stenoptilia alaii Gibeaux, 1995

Stenoptilia alaii Gibeaux, 1995: 98. (Type locality: Tajikistan).

Material. Central Tian-Shan', Suusarym val., vil. Tuluk, Charya creek val., N42°15', E73°54', 2280 m, 2.07.2008 – 14♂, 4♀; Zaala range, Nura vic., 3200-3500 m, 18-31.07.2006 – 11♂, 2♀, A. Sochivko; Tian-Shan' range, Talas Alatau, Kara-Buura mts. gorge, 3100-3350 m, 19.07.2000 – 2♂, E. Rutjan; Tian-Shan', Suusamyr-Too range, Kyrgyz mts. gorge, 2850 m, 29.07.2000 – 1♂, E. Rutjan; Inner Tian Shan', W. Kokshaal Too, Kuldza-Bashi, 3700 m, 24-26.07.2000 – 1♂, S. Churkin; Kashgaria, lower reaches of Archalsu riv., right affluent of Koksu riv., 19-21.07.2003 – 1♂, V. Dubatolov, E. Nikolaeva.

Range. Kyrgyzstan, Tajikistan, Kazakhstan.

Paraplatyptilia metzneri (Zeller, 1841)

Pterophorus metzneri Zeller, 1841: 783. (Type locality: Hungaria)

Mariana gaji Zagulajev, 1983: 119. (Type locality: N-W China, Xinjiang)

Material. 15 km E of Naryn, Naryn-Too range, 3000 m, 2.08.1981 – 1♂, S. Sinev; Terskey Alatau range, Karakol' gorge, 2000-2200 m, 26.07.1986 – 1♂, 2♀, I. Plusch; 80 km S. of Bishkek, log. Issyk-Ata, 17.07.1990 – 1♂, V. Zolotuchin; Tian-Shan', Kyrgyz range, Tjoo-Ashuu mts. gorge, 3150-3300 m, 12 – 15. 07. 2000 – 4♂, E. Rutjan; Tian-Shan', Kjungej Alatau range, Chong-Ak-Suu gorge,

2800-3000 m, 13.08.2000 – 1♀, E. Rutjan; Talas Alatau range, Manas mts, 2300-2450 m, 22.07.2000 – 1♂, E. Rutjan; Tian-Shan' range, Suusamyr-Too, Kyrgyz mts. gorge, 3050-3200 m, 30 - 31.07.2000 – 2♂, 1♀, E.Rutjan; West Kyrgyzstan, Chatkal riv., 15.07.2001 – 3♂♂, A. Zhdanko; 10 km W of vil. Tuluk, 3 km N of pass Jamanbai-Bel', 1990 m, N41°54', E73°28', 29-30.06.2008 – 8♂, 3♀; North. Alai, upper stream of Gultcha riv., Katta-Karakol riv. mouth vic. 14.07.2003 – 1♂, V. Dubatolov, E. Nikolaeva; Kashgaria, Taldy-Bulak creek, between Nura and Irkeshtam, to the light, 16-18.07.2003 – 3♂, 1♀, V. Dubatolov, E. Nikolaeva; Central Tian-Shan', Suusarym val., Tuluk vil. vic., Charya creek val., N42°15', E73°54', 2280 m, 2.07.2008 – 9♂, Zaala range, Aram-Kungei, 3000 m, 8.07.2008 – 1♂, P. Ustjuzhanin V. Kovtunovich; 5 km W of vil. Nura, Kaltabulak riv., 3100 m, 15.07.2008 – 8♂, 2♀, P. Ustjuzhanin, A. Sochivko; East Alai range, 15 km W of Nura, Koksu val., 3000 m, 16.07.2008 – 4♂, P. Ustjuzhanin, A. Sochivko; Zaala range, Taldy-Bulak creek, between Nura and Irkeshtam, 2900 m, 17.07.2008 – 2♂, P. Ustjuzhanin, A. Sochivko; 5 km W of vil. Nura, Kaltabulak riv., 3300 m, 18.07.2008 – 1♂, 1♀, P. Ustjuzhanin; Zaala range, Nura vic., 3200-3500 m, 18-31.07.2006 – 3♂♂, A. Sochivko; Alai range, Khaidarken town vic., Allaaddin riv., 2850-3000 m, 01-12.07.2007 – 1♀, A. Sochivko; Issyk-Kul' reg., 7 km N of Grigorievsk vil., Grigorievsk gorge, Karagai-Bulak range, Chan-Bulak mount., 2300 m, 27.07.2011 – 2♂, 1♀; Chui reg., Karagai-Bulak vil., Ysyk-Ata riv., 1300 m, 21.07.2011 – 1♂, V. Ivonin.

Range. Europe, South Siberia, Kazakhstan, Central Asia, the Caucasus, Asia Minor, Iran, N-W China, Mongolia.

Amblyptilia acanthadactyla (Hübner, [1813])

Alucita acanthadactyla Hübner, [1813] (Type locality: Europe)

Material. Osh town, 5.07.1986 – 1♂, (the collector is not known); Kashgaria, the lower reaches of Archalsu riv., right affluent of Koksu riv., 19-21.07.2003 – 1♂. V. Dubatolov, E. Nikolaeva; Tian Shan' range, Suusamyr, Ala-Bel' mts. gorge, Chuchkan riv. val., 1650-1700 m, 8.07.2005 – 1♀, E. Rutjan; Zaala range, Aram-Kungei, 3000 m, 8.07.2008 – 1♂, P. Ustjuzhanin, V. Kovtunovich.

Range. Europe, Asia Minor, South Siberia, Central Asia.

Amblyptilia grisea Gibeaux, 1997.

Amblyptilia grisea Gibeaux, 1997: 424. (Type locality: Alma-Ata, Kazakhstan).

Material. Tian Shan' range, Suusamur-Too, Kyzyl Oj, 1800 m, 10.07.2000 – 1♀, E. Rutjan; Zaala range, 25 km SW of Daraut-Kurgan, 2800 m, 6.07.2008 – 1♂, 1♀, P. Ustjuzhanin, V. Kovtunovich; Zaala range, Aram-Kungei, 3000 m, 8.07.2008 – 2♂, P. Ustjuzhanin V. Kovtunovich.

Range. South Kazakhstan, Kyrgyzstan, Tajikistan, South Siberia, Mongolia.

Marasmarcha colossa Caradja, 1920.

Marasmarcha colossa Caradja, 1920: 84. (Type locality: East Turkestan [N-W China])

Material. Tian Shan' range, Suusamur-Too, Kowjuksu, Kyzyl Oj, 1650 m, 26.06.2000 – 1♂, S. Churkin; Inner Tian-Shan', north. slope of Moldo-Too range, 5 km N of Korogo range – 2 spec., I. Plusch; 70 km SW of Bishkek, Belogorka vil. vic, 25.07.1987 – 1♀, A. Lwowskyi; Central

Tian-Shan', Kekemeran val., 1430 m, 1.07.2008 – 9 spec., P. Ustjuzhanin & V. Kovtunovich.

Range. China (Xinjiang), South of European Russia, South of Western Siberia, Kazakhstan, Kyrgyzstan, Tajikistan, Uzbekistan, Afghanistan.

Marasmarcha cinnamomea (Staudinger, 1870)

Pterophorus cinnamomeus Staudinger, 1870: 326. (Type locality: "Sarepta" [Krasnoarmeisk], Russia).

Marasmarcha glycyrrhizae Zagulajev, 1969: 212. (Type locality: Armenia).

Material. 25 km S of Kara-Balta, Sosnovka, to the light, 13.08.1987 – 1♀, A. Lwowskyi; 70 km SW of Bishkek, Belogorka vil. vic., 24.07.1987 – 1♂, A. Lwowskyi.

Range. South-East of European Russia, the Crimea, the Caucasus, Kazakhstan, Kyrgyzstan, Afghanistan, China, South of Western Siberia.

Procapperia kuldshaensis (Rebel, 1914)

Oxyptilus kuldshaensis Rebel, 1914: 272. (Type locality: China, Xinjiang).

Procapperia asiatica Zagulajev, 1986: 87. (Type locality: Kyrgyzstan).

Material. South Kyrgyzstan, Naryn riv., 10 km N of Kara-Kul' town, 1020, m 15.07.1996 – 1♂, 1♀, I. Plusch; north. part of Fergana range, 10 km N of Kara-Kul' town, 1100 m, 6.07.1999 – 1♂, 1♀, I. Plusch; Inner Tian-Shan', Min-Kush vil. vic., 2300 m, 1.08.2000 – 1♀, I. Plusch; Chatkal riv. val., 15 km NE of Kanysh-Kiya, 1900 m, 15-16.07.2001 – 2♂, A. Zhdanko; Inner Tian Shan', Naryn riv. val., 15 km E of Naryn, 2250 m, 22.07.2001 – 1♀, S. Churkin; Tian-Shan' range, Suusamyr-Too, Kyrgyz mts. gorge, 3050-3200 m, 29-30.07.2000 – 2♂, E. Rutjan; Tian-Shan', vil. Dzhalal-Abad, Tash-Kumyr, 850 m, 2.06.2003 – 2♀; Issyk-Kul', Kadzny-Sai vic., 1650 m, 4.05.2003 – 1♂, Tian-Shan', vil. Dzhalal-Abad, Tash-Kumyr, 950 m, Kyzyl-Dzhar vic., 15.05.2003 – 1♂, E. Rutjan; Sary-Chelek, 1900 m, 20.06.2004 – 3♂, 1♀, Danilevskyi; 131 km S of Osh, upper stream of Kichik-Alai riv., 3300 m, 25.06.2008 – 22 spec., 25 km S of Osh, 1700 m, 26.06.2008, 1550 m – 3 spec., Toktogul reservoir, 915 m, 28.06.2008 – 21 spec., Alai range, Batken reg., Kara-Bulak vil. vic., 3500 m, 15.07.2007 – 3♂, 1♀, A. Sochivko; 10 km W of Tuluk vil., 3 km N of pass Jamanbai-Bel', 1990 m, N41°54', E73°28', 29-30.06.2008 – 10 spec., Sary-Kamysh, 1250 m, 30.06.2008 – 22 spec., Central Tian-Shan', Kekemeran Valley, 1430 m, 1.07.2008 – 9 spec., Inner Tian Shan', Kyury-Sai Dam, 41°35' N, 72°33'E, 3.07.2008 – 6 spec., Zaala Range, 25 km SW of Daraut-Kurgan, 2800 m, 6.07.2008 – 1♀, Alai Valley, 20 km SW of Daraut-Kurgan, 2700 m, 7.07.2008 – 2♂, 1♀; Zaala Range, Aram-Kungei, 3000 m, 8.07.2008 – 9 spec., P. Ustjuzhanin, V. Kovtunovich; W. Tian-Shan', 30 km NW of Tash-Kumyr, 1400 m, 12.07.2008 – 2♂, 2♀, 5 km W of Nura vil. Kaltabulak riv., 3100 m, 15.07.2008 – 6♂, 10♀; 3300 m, 18.07.2008 – 2♂, P. Ustjuzhanin, A. Sochivko; Central Tian-Shan', right bank of Naryn riv., Kazarman vil. vic., 1500 m, 6-7.08.2008 – 6 spec., A. Sochivko.

Range. China (Xinjiang), Ukraine, Georgia, Turkey, Kyrgyzstan, Kazakhstan, Uzbekistan, Tajikistan, Mongolia, South Siberia (Altai, Kemerovo, Tuva), Afghanistan, Pakistan.

Procapperia orientalis Arenberger, 1988

Procapperia orientalis Arenberger, 1988: 24. (Type locality: India, Kashmir).

Range. India (Kashmir), Uzbekistan, Kyrgyzstan, Turkmenistan, Tajikistan.

Notes. Specified for Kyrgyzstan from the literature [Gibeaux, 1996].

Capperia trichodactyla (Denis & Schiffermüller, 1775)

Alucita trichodactyla Denis & Schiffermüller, 1775: 145. (Type locality: Austria).

Material. Naryn natural reserve, tract Iyri-Suu riv., 2500 m, 16.07.1987 – 1♂, V. Mironov; Tian-Shan', vil. Dzhalal-Abad, Tash-Kumyr, 950 m, Kyzyl-Dzhar vic., 15.05.2003 – 1♂, E. Rutjan.

Range. Europe, Kyrgyzstan, Siberia, Russian Far East, Japan, China (Heilongjiang).

***Capperia pluschi* sp. n.**

Material. Holotype, male, ZISP, gen. prep. 1796, N - W Tian Shan', Pskemsky range, Koksu riv., 1300-2300 m, 21-24.06.2004 – 1♂, Nikiphorov S. Leg. (col. pl. II: 3, 7).

External characters. The head, thorax and tegulae are brown grey. The labial palpi are quite long, almost two times longer than the eye diameter. They are straight, directed forward and upward, coloured in alternate brown and white bands. The antennae are variegated, white brown. The length of the forewing is 10,5 mm. The wingspan is 22 mm. The forewings are brown grey. On the first blade there are two bands, the band is narrow near the apical part and wide near the middle of the cleft. In the cleft base there is a white spot. On the second blade there are also two bands: the wide and narrow one. The fringe inside the cleft is greyish white. On the hind edge of the forewing the fringe is light grey with patches of dark flakes. The hindwings are monotonous brown-grey. The third blade has a spot of dark flakes near the apical part, the apex itself has a small and distinct dark spot. On the outer and inner edges of the third blade there are individual inclusions of dark flakes.

Male genitalia. The valvae have an oval cut in the basal part. There are distinct folds on their apexes. The tegumen is narrow and elongated. The uncus is short and narrow. The 8th sternite is long, distinctly narrowed behind its middle. It ends with two narrow pointed appendages. The aedeagus is S-curved, its end is slightly split.

Differential diagnosis. In the colour of wings the new species is similar to *Capperia bonneau* Bigot, but is different from the latter by a larger size and by another location of dark flakes on the third blade of the hindwing. In the male genitalia, by the elongated 8th sternite the species is similar to *Capperia salanga* Arenb., but clearly differs from it by the shape of valvae and aedeagus.

Flight period. June.

Range. Uzbekistan.

Etymology. The species is named after the Ukrainian entomologist, Igor Plusch, a known specialist in Rhopalocera.

Notes. This species was collected in Uzbekistan, Tashkent region, the territory bordering with Kyrgyzstan, so we include it in this article.

Oxyptilus chrysodactyla (Denis & Schiffermüller, 1775)

Alucita chrysodactyla Denis & Schiffermüller, 1775: 320.

(Type locality: Austria).

Oxyptilus perunovi Ustjuzhanin, 1996: 385. (Type locality: Altai, Russia).

Material. Alai range, Maydantau, Maydan vil., 1700 m, 4.07.1998 – 1♂, I. Plusch; Issyk-Kul' reg., 7 km N of Grigorievsk vil., Grigorievsk gorge, Karagai-Bulak range, Chan-Bulak mount., 2300 m, 27.07.2011 – 1♂, V. Ivonin.

Range. Europe, the Caucasus, Siberia, Primorye, Primorye, Sakhalin, China (Heilongjiang), Japan.

Crombrugghia distans (Zeller, 1847)

Pterophorus distans Zeller, 1847: 902. (Type locality: Italy).

Oxyptilus supplementum Gibeaux, 1997: 432. (Type locality: Uzbekistan).

Material. Central Tian-Shan', right bank of Naryn riv., Kazarman vil. vic., 1500 m, 6-7.08.2008 – 1♀, A. Sochivko.

Range. N. Africa, the Canare islands, Europe, the Caucasus, Asia, Minor, Iran, Afghanistan, India, the Himalaya, Central Asia, Kazakhstan, China, the southern Siberia.

Crombrugghia tristis (Zeller, 1839)

Pterophorus tristis Zeller, 1839: 277. (Type locality: Poland).

Material. 25 km S of Osh, 1700 m, 26.06.2008, 1550 m – 15 spec., P. Ustjuzhanin, V. Kovtunovich.

Range. Europe, the Caucasus, Central Asia, southern West Siberia, China (Shaanxi).

Stangeia siceliota (Zeller, 1847)

Pterophorus siceliota Zeller, 1847: 907. (Type locality: Sicily).

Material. Inner Tian Shan', Kyury-Sai Dam, N41°35', E72°33', 3.07.2008 – 1♀, P. Ustjuzhanin, V. Kovtunovich.

Range. Europe, the Caucasus, Asia Minor, Saudi Arabia, Yemen, Turkmenistan, Kyrgyzstan, Iraq, Iran, Afghanistan, China (Hunan).

Hellinsia inulae (Zeller, 1852)

Pterophorus inulae Zeller, 1852: 384. (Type locality: Poland).

Material. Central Tian-Shan', Kekemeran val., 1430 m, 1.07.2008 – 1♀, P. Ustjuzhanin, V.

Kovtunovich; Central Tian-Shan', right bank of Naryn riv., Kazarman vil. vic., 6.08.2008 – 1♀, A. Sochivko leg.

Range. Europe, North. Africa, Kazakhstan, Central Asia, Siberia.

Hellinsia didactylites (Strom, 1783)

Phalaena Alucita didactylites Strom, 1783: 89. (Type locality: Norway).

Material. Naryn natural reserve, tract Iyri-Suu riv., 2500 m, 17.07.1987 – 1♀, V. Mironov; Chatkal riv. val., 28.06.1988 – 2♂, I. Plusch; North. Alai, upper stream of Gulcha riv., Katta-Karakol riv. mouth, 14.07.2003 – 1♀, V. Dubatolov, E. Nikolaeva.

Range. Europe, Kazakhstan, Central Asia, Siberia, the Far East of Russia, China: Shaanxi, Jilin [Li, Hao, Wang, 2003].

Hellinsia distinctus (Herrich-Schaffer, 1855)

Pterophorus distinctus Herrich-Schaffer, 1855: 379. (Type locality: Germany).

Pterophorus sibiricus Caradja, 1920: 86. (Type locality: Symonovo, Amur region, Russia)

Oidamatophorus acutus Yano, 1963: 179. (Type locality:

Japan).

Range. Europe, Central Asia, Siberia, the Far East of Russia, Manchuria, Japan, China.

Note. Specified for Kyrgyzstan [Arenberger, 1995]; was not found by us.

***Hellinsia osteodactylus* (Zeller, 1841)**

Pterophorus osteodactylus Zeller, 1841: 851. (Type locality: Poland).

Pterophorus korbi Caradja, 1920: 86. (Type locality: Khabarovk, Russia).

Pterophorus turbidellus Caradja, 1920: 86. (Type locality: Uralsk, Kazakhstan).

Pterophorus sophronistes Meyrick, 1938: 170. (Type locality: China).

Material. South coast of Issyk-Kul' reservoir, East of Kara-Beltek Mts., to the light, 4.08.2003 – 1♂, V. Dubatolov, E. Nikolaeva.

Range. Europe, the Caucasus, Central Asia, Kazakhstan, Siberia, Russian Far East, Mongolia, China: Heilongjiang, Shandong, Shanxi, Xinjiang, Yunnan, Ningxia [Li, Hao, Wang, 2003], Japan.

***Hellinsia chrysocomae* (Ragonot, 1875)**

Leioptilus chrysocomae Ragonot, 1875: 113. (Type locality: France).

Leioptilus gozmanyi Bigot, 1970: 285. (Type locality: Mongolia).

Material. 25 km S of Kara-Balta, Sosnovka, to the light, 11.08.1987 – 1♀, A. Lwowskyi; 28.06.1997 – 1♀, I. Plusch; Inner Tian-Shan', Min-Kush vil. vic., 2300 m, 1.08.2000 – 1♂, I. Plusch; Inner Tian Shan', Naryn riv. val., 15 km E of Naryn, 2250 m, 27–28.07.2000 – 14 spec; NE of Fergana range, 10 km SW of Alai, East Kugart riv., 2000 m, 20.07.2000 – 2♂; Toktogul area, Karasu, 2100 m, 16.06.2000 – 3♀, S. Churkin; Tian-Shan', Kyrgyz range, Tjoo-Ashuu mts. gorge, 2200 m, 26.07.2000 – 1♀, E. Rutjan; Tian Shan', vil. Naryn, Chu riv., Orto-Tokoj reservoir, 1650 m, 7.07.2000 – 1♀, E.; Alai range, Khaidarken town vic., Allauddin riv., 2850-3000 m, 01-12.07.2007 – 1♀, A. Sochivko; 131 km S of Osh, upper stream of Kichik-Alai riv., 3300 m, 25.06.2008 – 1♀; Central Tian-Shan', Suusarym val., Tuluk vil. vic., Charya creek val., N42°15', E73°54', 2280 m, 2.07.2008 – 1♂, 1♀; Zaalai range, Aram-Kungei, 3000 m, 8.07.2008 – 1♀, P. Ustjuzhanin & V. Kovtunovich; 5 km W of Nura vil., Kaltabulak riv., 3100 m, 15.07.2008 – 1♀; 5 km W of Nura vil., Kaltabulak riv. 3300 m, 18-19.07.2008 – 2♂, 3♀, P. Ustjuzhanin, A. Sochivko.

Range. Europe, the Caucasus, Kazakhstan, Central Asia, Siberia, Russian Far East, Mongolia, China.

***Hellinsia pectodactylus* (Staudinger, 1859)**

Pterophorus pectodactylus Staudinger, 1859: 258. (Type locality: Spain).

Material. Sary-Chelek, 900 m, 20.06.2004 – 3♂, 2♀, Danilevskyi; Kichik-Alai Range, Isfajram-Sai riv., 2750 m, 14-19.07.1999 – 1♂, E. Rutjan; south. slope of Moldo-Too range, upper part of Teke-Uyuk gorge, 29.07.2003 – 1♂, V. Dubatolov, E. Nikolaeva; 10 km W of Tuluk vil., 3 km N of pass Jamanbai-Bel', 1990 m, N 41°54', E 73°28', 29-30.06.2008 – 1♀, P. Ustjuzhanin & V. Kovtunovich.

Range. Europe, North. Africa, Kazakhstan, Kyrgyzstan,

Afghanistan, Nepal, India, Canada, U.S.A.

***Hellinsia pseudokorbi* (Gibeaux, 1997)**

Oidaematophorus pseudokorbi Gibeaux, 1997: 443. (Type locality: Uzbekistan).

Material. Ala-Myshik range, S of Naryn town, 5.08.1981 – 3♂, S. Sinev; Issyk-Kul' reg., Sary Jaz, north. slope of Kaindy range, Tashkoro, 2900 m, 23.07.1983 – 1♂, 13.07.1986 – 1♂; Alai range, Maydantau, Maydan vil., 1700 m, 4.07.1998 – 1♀, I. Plusch; NE of Zaalai, 15 km W of Ishtam, Koksu riv., 3100 m, 17.07.2000 – 3♂; Inner Tian Shan', Naryn riv. val., 15 km E of Naryn, 2250 m, 27–28.07.2000 – 79 spec., S. Churkin; lower reaches of Archalsu riv., right affluent of Koksu riv., 19-21.07.2003 – 2♂, 5♀, V. Dubatolov, E. Nikolaeva; Kashgaria, Taldy-Bulak creek, between Nura and Irkeshtam, to the light, 17-18.07.2003 – 4♂, 1♀; South. slope of Moldo-Too range, upper part of Teke-Uiuk gorge, 29.07.2003 – 1♂, V. Dubatolov, E. Nikolaeva; Zaalai range, Aram-Kungei, 3000 m, 8.07.2008 – 4♂, 3♀, P. Ustjuzhanin & V. Kovtunovich; East Alai range, 15 km W of Nura, Koksu val., 3000 m, 16.07.2008 – 4♂, P. Ustjuzhanin, A. Sochivko.

Range. Uzbekistan, Kyrgyzstan.

***Oidaematophorus rogenhoferi* (Mann, 1871)**

Pterophorus rogenhoferi Mann, 1871: 79. (Type locality: Austria).

Material. Naryn town vic., 3-5.08.1981 – 2♂, S. Sinev; Kitshik-Alai range, Isfajram-Sai riv., 2750 m, 14-19.07.1999 – 2♂, E. Rutjan; Baidullu range, pass Dolon, 2100 m, 22-23.07.2001 – 1♂, 1♀, V. Dubatolov; Zaalai range, Aram-Kungei, 3000 m, 8.07.2008 – 1♀, P. Ustjuzhanin & V. Kovtunovich; South Kyrgyzstan, 5 km W of Nura vil., Kaltabulak riv., 3300 m, 18.07.2008 – 2♂, P. Ustjuzhanin.

Range. Europe, Central Asia, Siberia, Priamurye, Primorye, China (Heilongjiang).

***Oidaematophorus lithodactylus* (Treitschke, 1833)**

Alucita lithodactyla Treitschke, 1833: 245. (Type locality: Hungary).

Material. Tian Shan' range, Suusamyr-Too, Kowjuksu, Kyzyl Oj, 1650m, 26.06. 2000 – 1♂, S. Churkin.

Range. Europe, Asia Minor, the Caucasus, Central Asia, Siberia, Priamurye, Japan, China (Xinjiang).

***Emmelina monodactyla* (Linnaeus, 1758)**

Phalaena Alucita monodactyla Linnaeus, 1758: 542. (Type locality: Europe).

Material. Osh, 31.08.1980 – 1♂, 22.06.1982 – 1♀, 25.08.1982 – 3♂, 5♀, 6.09.1982 – 1♀, 22. 09. 1982 – 1♀, S. Rybin; 24.06.2008 – 1♀, V. Kovtunovich & P. Ustjuzhanin; Alai range, Maydantau, Maydan vil., 1700 m, 4.07.1998 – 2♂; Alai range, Isfajram-Sai, tract Langar, 1900 m, 13.07.1999 – 1♀; Inner Tian-Shan', north. slope of Moldo-Too range, 5 km N of pass Korogo, 1800 m, 16.07.1998 – 1♂, I. Plusch; Issyk-Kul', Kadzhy-Sai vic., 1650 m, 3-4.08.2000 – 1♂, 2♀, E. Rutjan; 2.08.2003 – 1♀, V. Dubatolov, E. Nikolaeva; the alpine camp "Dugoba", 20.07.1999 – 1♂, C. Chebatorev; 25 km S of Osh, 1700 m, 26.06.2008, 1550 m – 1♂; 10 km W of Tuluk vil., 3 km N of pass Jamanbai-Bel', 1990 m, N41°54', E73°28', 29-30.06.2008 – 1♂, 1♀; Sary-Kamysh, 1250 m, 30.06.2008 – 1♂; Central Tian-Shan', Kekemeren val., 1430 m,

1.07.2008 – 4♂, 2♀; Central Tian-Shan', Suusarym val., Tuluk vil. vic., Charya creek val., N42°15', E73°54', 2280 m, 2.07.2008 – 4♂, 1♀; Zaalai range, 25 km SW of Daraut-Kurgan, 2800 m, 6.07.2008 – 1♀; W. Tian-Shan', 30 km NW of Tash-Kumyr, 1400 m, 12.07.2008 – 2♂; Alai range, 5 km S of Gyulcha, 1800 m, 14.07.2008 – 1♂ P. Ustjuzhanin, V. Kovtunovich; Central Tian-Shan', right bank of Naryn riv., Kazarman vil. vic., 6.08.2008 – 1♀, A. Sochivko leg.; Tian-Shan', vil. Dzhalal-Abad, Kyayl-Unkur vic., Kara-Unkur riv. val., 1350 m, 18-20.05.2003 – 1♀, E. Rutjan; Alai range, vil. Batken, Kitshik-Alai range, 2800-3200 m, 12-19.07.2005 – 1♀, E. Rutjan; Sary-Chelek, 1900 m, 20.06.2004 – 1♀; Bishkek, 13.07.2004 – 1♂, Danilevskyi; Chui reg., Tokmak, 18.07.2011 – 1♂, Chui reg., Karagai-Bulak vil., Ysyk-Ata riv.- 20-23.07.2011 – 3♂, 2♀, V. Ivonin.

Range. North Africa, Europe, the Caucasus, Central Asia, Kazakhstan, southern Siberia, eastwards to Tuva, North America, China, Korea.

***Calyciphora ludmilae* sp.n.**

Material. Holotype: ♂, ISEA, gen. prep. 201113, Kyrgyzstan, Kashgaria, Taldy-Bulak creek, between Nura and Irkeshtam vil., to the light, 18.07.2003, V. Dubatolov, E. Nikolaeva;

Paratype: 1♂, ZISP, gen. prep. 1795, ibidem; 1♂, Col. Ust. & Kovt., Kashgaria, lower reaches of Archalsu riv., right tributary of Koksu riv., 19-21.07.2003, V. Dubatolov, E. Nikolaeva; 1 spec., (without abdomen), Col. Ust. & Kovt., Zaalai range, Taldy-Bulak creek, between Nura and Irkeshtam vil., 2900 m., 17.07.2008, P. Ustjuzhanin, A. Sochivko (col. pl. II: 4, 8).

External characters. The head and thorax are yellow brown, with a dark brown band between the head and the thorax. The labial palpi are short, light brown, directed upward. The antennae are thin, smooth, light yellow. The length of the holotype forewing is 11.5 mm. The wingspan is 24-25 mm. The forewings are yellow brown. The cleft is split to the middle of the wing. The costal edge of the first blade is distinctly darkened, there are two distinct dark brown strokes in its apical part, the first is above the middle of the cleft, the second is near the top. The cleft base has brown flakes. The fringe on the forewings is dark brown; only in the first third of the wing, on its inner edge, it is light yellow. The hindwings are monotonous brown, the fringe on them is slightly lighter than their main tone.

Male genitalia. The valvae are almost symmetrical. They differ only by a presence of a sclerotized harpae in the base of the left valva. It has an appendage shaped like a spike pointed at the top. The apexes of the valvae have ear-shaped membranous projections. Near them on the inner edge are small rod-like appendages. Costal processes on the inner edge of the valvae are distinct. The inner edge of the saccus has a well-defined circular notch. The anellus has two short wide branches. The uncus is long, thin, and pointed at the end. The aedeagus is thin, rather short, slightly winding.

Differential diagnosis. In the colour of wings the new species is similar to *Calyciphora xerodactyla* Zell., but differs from the latter by the presence of a dark spot on the top of the first blade. In the male genitalia in the shape of valvae the new species is similar to *Calyciphora*

xanthodactyla Tr., but differs clearly from the latter by the shape and size of the harpa on the left valva and by the shape of aedeagus.

Flight period. July.

Range. South Kyrgyzstan.

Etymology. The species is named after the wife of the first author of this article, Ludmila Ustuzhanina.

***Tabulaeaphorus narynus* Arenberger, 1993**

Tabulaeaphorus narynus Arenberger, 1993: 320. (Type locality: Kyrgyzstan).

Material. 5 km SW of Naryn town, 26.07.1981 – 1♂, S. Sinev; Kitshik-Alai range, Isfajram-Sai riv., 2750 m, 14-19.07.1999 – 1♂, E. Rutjan.

Range. Kyrgyzstan, Uzbekistan.

***Tabulaeaphorus hissaricus* (Zagulajev, 1986)**

Pterophorus hissaricus Zagulajev, 1986: 91. (Type locality: Tajikistan)

Material. W. Tian-Shan', 30 km NW Tash-Kumyr, 1400 m, 12.07.2008 – 1♂, P. Ustjuzhanin & A. Sochivko.

Range. Tajikistan, Uzbekistan, Kyrgyzstan.

***Tabulaeaphorus maracandicus* Arenberger & Buchsbaum, 1998**

Tabulaeaphorus maracandicus Arenberger & Buchsbaum, 1998: 288. (Type locality: Uzbekistan).

Material. Zaalai range, 25 km SW of Daraut-Kurgan, 2800 m, N 39.27', E 72.01' 6.07.2008 – 1♂, P. Ustjuzhanin, V. Kovtunovich.

Range. Uzbekistan, Tajikistan.

***Tabulaeaphorus decipiens* (Lederer, 1870)**

Pterophorus decipiens Lederer, 1870: 27. (Type locality: Iran, Astrabad).

Pterophorus tristanae Zagulajev, 1986: 93. (Type locality: Kyrgyzstan).

Range. Iran, Kyrgyzstan, the Caucasus, Armenia, Tajikistan.

Notes. Specified for Kyrgyzstan as *Pterophorus tristanae* Zagulajev [Zagulajev, 1986].

***Merrifieldia alaica* (Caradja, 1920)**

Alucita alaica Caradja, 1920: 81. (Type locality: Kyrgyzstan).

Material. Sary-Kamysh, 1250 m, 30.06.2008 – 1♂, Alai range; 10 km W of Gyulcha, 1700 m, 9.07.2008 – 1♂, P. Ustjuzhanin, V. Kovtunovich; W. Tian-Shan', 30 km NW of Tash-Kumyr, 1400 m, 12.07.2008 – 4♂, 2♀, P. Ustjuzhanin & A. Sochivko.

Range. Kyrgyzstan, Afghanistan.

***Merrifieldia baliocdactylus* (Zeller, 1841)**

Alucita tridactylus Stephens, 1834: 373. (Type locality: England).

Material. Terskei Alatau, Karakol' gorge, 2000-2200 m, 26.07.1986 – 2♂, I. Plusch.

Range. Europe, the Caucasus, Kazakhstan, Kyrgyzstan, West Siberia, China (Xinjiang).

***Merrifieldia tridactyla* (Linnaeus, 1758)**

Phalaena Alucita tridactyla Linnaeus, 1758: 542. (Type locality: Europe).

Material. South. coast of Issyk-Kul' lake, East Kara-Beltek mts., to the light, 4.08.2003 – 1♂, V. Dubatolov, E. Nikolaeva.

Range. Europe, Asia Minor, Iran, the Caucasus, Central

Asia, Siberia.

***Merrifieldia malacodactyla* (Zeller, 1847)**

Pterophorus malacodactylus Zeller, 1847: 905. (Type locality: Italy).

Material. 10 km W of Tuluk vil., 3 km N of pass Jamanbai-Bel', 1990 m, N41°54', E73°28', 29-30.06.08 – 11 spec., P. Ustjuzhanin & V. Kovtunovich.

Range. Europe, Asia Minor, Iran, the Caucasus, Syria, Israel, Kazakhstan, Central Asia, Saudi Arabia, Iran, Iraq, Afghanistan.

***Merrifieldia caspia* (Lederer, 1870)**

Pterophorus caspius Lederer, 1870: 27. (Type locality: Iran).

Material. South. Kyrgyzstan, NW part or Fergana range, Alash gorge, 1100 m, 7.07.1988 – 1♂, 1♀; Inner Tian-Shan', Min-Kush vil. vic., 1.08.2000 – 2♂; NW spur of Fergana Range., Alash-Sai gorge, 1100 m, 6.07.1999 – 1♂; lower reaches of Naryn riv., 10 km N of Kara-Kul' town, 1020 m, 15.07.1986 – 3♂, 3♀; Alai range, Maydantau, Maydan vil., 1700 m, 4.07.1998 – 1♂, 1♀, I. Plusch; North. Alai, 16 km SSE of Gulcha vil., 2 km SE of Kyzyl-Korgon, karagan area, 1750 m, 11.07.2000 – 1♂; North. Alai, left slope of Gulcha riv., 3 km below the mouth of Katta-Karakol' riv., 2500-3000 m, 12.07.2003 – 1♀, V. Dubatolov; Tian Shan', vil. Naryn, Churiv., Orto-Tokoj reservoir, 1650 m, 7.07.2000 – 1♀; Issyk-Kul', Kadzny-Sai vic., 1650 m, 8-9.07.2000 – 1♂, 1♀; Tian Shan' range, Suusamur-Too, Kyzyl Oj, 1800 m, 10.07.2000 – 1♂; Issyk-Kul', Kadzny-Sai vic., 1650 m, 3-4.08.2000 – 1♂; Tian-Shan', vil. Dzhalal – Abad, Tash-Kumyr vic., loc. Ak-Mula, 850 m, 27.05.2003 – 1♂, 1♀, E. Rutjan; 30 km W of vil. Rybachie, Orto-Tokoi reservoir, 14.07.1998 – 1♀; 50 km N of Naryn town, Nura range, 16.07.1999 – 1♀, A. Zhdanko; Toktogul dam, 915 m, 28.06.2008 – 56 spec., 10 km W of Tuluk vil., 3 km N of pass Jamanbai-Bel', 1990 m, N41°54', E73°28', 29-30.06.08 – 21 spec., 25 km S of Osh, 1700 m, 26.06.2008, 1550 m – 7 spec.; Central Tian-Shan', Kekemerem val., 1430 m, 1.07.2008 – 5 spec., Inner Than Shan', Kyury-Sai Dam, N41°35', E72°33', 3.07.2008 – 12 spec., Alai range, 10 km W of Gyulcha, 1700 m, 9.07.2008 – 5 spec., P. Ustjuzhanin & V. Kovtunovich; W. Tian-Shan', 30 km NW of Tash-Kumyr, 1400 m, 12.07.2008 – 9 spec., P. Ustjuzhanin & A. Sochivko; Central Tian-Shan', right bank of Naryn riv., Kazarman vil. vic., 1500 m, 6-7.08.2008 – 5 spec., A. Sochivko.

Range. Iran, Turkey, Turkmenistan, Uzbekistan, Tajikistan, Kyrgyzstan, China (Xinjiang), India.

***Merrifieldia huberti* Arenberger, 1999**

Merrifieldia huberti Arenberger, 1999: 216. (Type locality: Kyrgyzstan).

Material. Issyk-Kul', Kadzny-Sai vic., 1650 m, 9.07.2000 – 1♀; Inner Tian Shan', vil. Naryn, Kara-Kul' vic., pag. Kara-Kjol', 1000-1350 m, 12-14.05.2003 – 5♂, 1♀; Tian Shan' range, Suusamur-Too, Kyzyl Oj, 1800 m, 10.07.2000 – 1♀; Tian-Shan', vil. Dzhalal-Abad, distr. Kotshkor-Ata, pag. Toskool vic., Alash-Sai gorge, 1100 m, 16-17.05.2003 – 1♂; Tian-Shan', vil. Dzhalal-Abad, prope Kyayl-UNKUR, Kara-UNKUR riv. val., 1350 m, 18-20.05.2003 – 1♀; Tian-Shan' occ. range Chatkal, Ala-Buka vic., Terek-Sai vic., Kazan-Saj riv. val., 2000 m, 24-26.05.2003 – 1♂; Tian-Shan', vil. Dzhalal-Abad, Tash-Kumyr vic., loc. Ak-Mula, 850 m, 27.05.2003 – 4♂, E. Rutjan; North. Alai, 16

km SSE of vil. Gulcha, 2 km SE of Kyzyl-Korgon, karagan area, 1750 m, 11.07.2000 – 1♂, V. Dubatolov.

Range. Kyrgyzstan.

***Wheeleria kasachstanica* Arenberger, 1995**

Wheeleria kasachstanica Arenberger, 1995: 84. (Type locality: Kazakhstan).

Wheeleria orophila Gibeaux, 1997: 437. (Type locality: Kazakhstan).

Range. Kazakhstan, Kyrgyzstan.

Notes. Specified for Kyrgyzstan from the literature [Gielis, 2003].

***Oirata nivella* (Ustjuzhanin, 2001)**

Merrifieldia nivella Ustjuzhanin, 2001: 22. (Type locality: Tajikistan).

Material. Sary Jaz, Kaingdy range, Tashkoro, 2600 m, 9.07.1985 – 5♂, I. Plusch.

Range. Tajikistan, Kyrgyzstan.

***Pterophorus pentadactyla* (Linnaeus, 1758)**

Phalaena Alucita pentadactyla Linnaeus, 1758: 542. (Type locality: Sweden).

Range. Europe, Asia Minor, Iran, the Caucasus, Central Asia, Kazakhstan, Kyrgyzstan, China: Jilin, Sichuan, Yunnan, Xinjiang, Taiwan [Li, Hao, Wang, 2003], West Siberia, Russian Far East.

Notes. Specified for Kyrgyzstan from the literature [Gielis, 2003], not detected by us.

Notes:

Platyptilia ainonis Matsumura, 1931. We consider the record of this species from Kyrgyzstan [Arenberger, 2001] to be a mistake. According to our findings, this East Palearctic species is not found to the West of Transbaikalia.

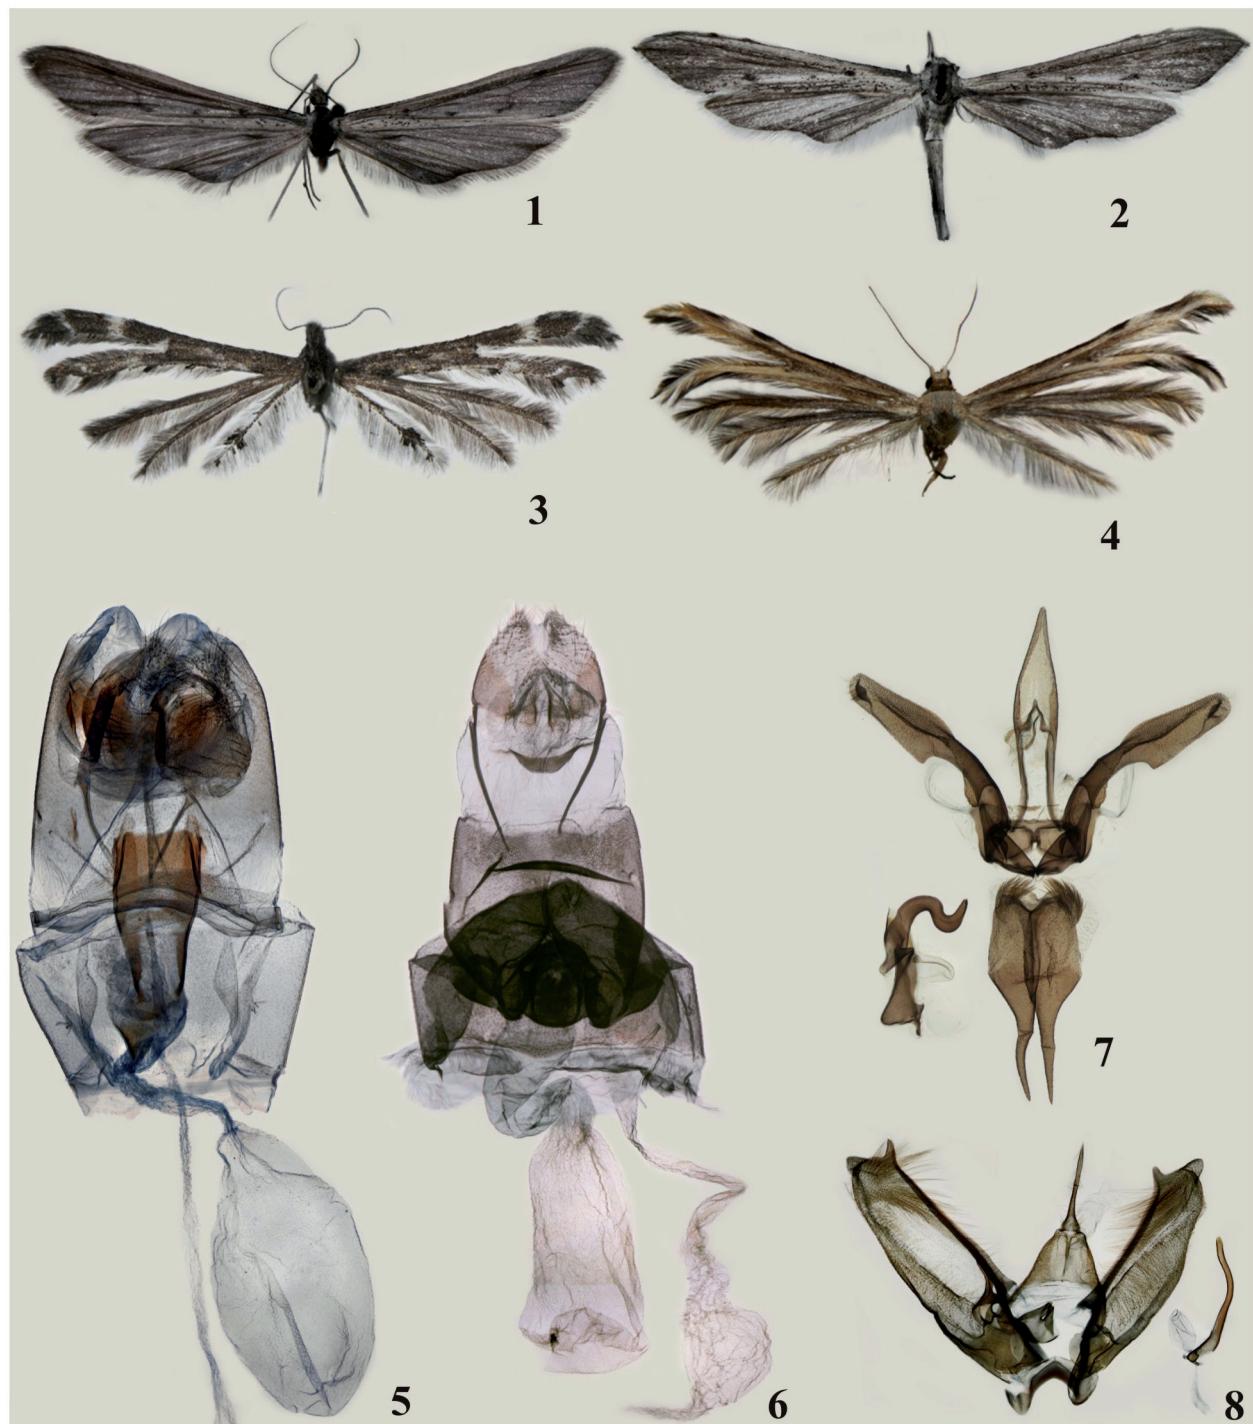

ACKNOWLEDGEMENTS

The authors are grateful to the collectors of the material of Pterophoridae in Kyrgyzstan: V. Dubatolov, V. Ivonin (Novosibirsk), A. Sochivko, S. Churkin, E. Nikolaeva, M. Danilewskyi (Moscow), S. Sinev, A. Lvovskyi, (St. Petersburg), E. Rutjan, I. Plusch (Kiev, the Ukraine), A. Zhdanko (Alma-Ata, Kazakhstan), S. Nikiphorov (Tashkent, Uzbekistan). We are also deeply grateful to the curators of the lepidopterological collections V. Dubatolov, (ISEA, Novosibirsk, Russia) and S. Sinev (ZISP, St. Petersburg, Russia) for the opportunity to study the fund materials of Pterophoridae.
